Data Engineer with hands-on experience in production data platforms, ETL/ELT pipelines, and enterprise data operations. Currently working at IBM, supporting large-scale batch processing, data transformations, and production environments using dbt, Snowflake, Control-M, IBM DataStage, SQL, and Python scripting. Strong background in data quality, automation, and operational support, with prior experience in frontend web development and software quality assurance—bringing a well-rounded perspective on system reliability, data accuracy, and end-to-end delivery. Experienced team lead with exposure to mentoring, process improvement, and cross-functional collaboration.

PROFESSIONAL EXPERIENCE

Data Engineer (DataOps & Production Support)

IBM Solutions Delivery, Inc.

June 2024 - Present | Full-time

- Provide end-to-end production support for enterprise data platforms, handling L1-L3 incidents including batch failures, data issues, and code-related defects
- Monitor and manage batch cycles using Control-M, ensuring timely and accurate data delivery across downstream systems
- Develop, enhance, and maintain ELT pipelines using dbt and Snowflake SQL to transform raw data into analytics-ready datasets
- Implement data validation, reconciliation, and cleansing logic to improve data accuracy and reliability
- Perform root cause analysis (RCA) for recurring production issues and propose long-term fixes and operational improvements
- Collaborate with business analysts, onshore/offshore developers, and external vendors to implement data changes and enhancements
- Utilize Microsoft Copilot and Python scripting for automation, operational support, and data checks within scheduled jobs and workflows
- Contribute to continuous improvement initiatives by optimizing processes, standardizing workflows, and enhancing monitoring practices
- Support version-controlled deployments using Git, following established branching and release processes
- Act as a team lead for an offshore team of data engineers, providing guidance, task coordination, and technical mentoring

JR. QA SPECIALIST

OOm Singapore

August 2023 - June 2024 | Full-time

- Conducted comprehensive quality assurance activities including functional, regression, UAT, and cross-browser testing
- Performed root cause analysis on defects, collaborating closely with developers to ensure timely and effective resolutions
- Utilized BrowserStack for multi-device and cross-browser testing to ensure consistent user experience
- Maintained high-quality delivery standards through detailed test documentation and strict quality checks
- Strengthened data accuracy and system reliability awareness, later applied in data engineering and production support roles

SOFTWARE QA ASSOCIATE

I-Asiatic Innovations Phils. Inc

March 2023 - July 2023 | Internship

- Applied automation testing using Playwright and Cypress, reducing manual testing time and improving test coverage
- Collaborated seamlessly across departments to uphold stringent quality assurance standards, driving client satisfaction through meticulous manual testing, bug resolution, and precise documentation practices.
- Employed a diverse array of testing methodologies, including E2E, regression, user acceptance (UAT), performance, and API testing, ensuring the delivery of error-free websites to end-users.

FRONTEND WEB DEVELOPER

Bit Create IT Solutions

July 2022 - December 2022 | Internship

- Contributed to the development of a web-based car rental system using Vue.js and Quasar framework
- Implemented UI components and improved user experience based on design specifications
- Supported documentation and basic database handling for application maintenance

CORE SKILLS

- Data Engineering & Warehousing: dbt, Snowflake, IBM DataStage, ETL/ELT pipelines, data modeling (star schema concepts), data quality checks
- Orchestration & Operations: Control-M, batch monitoring, job failure resolution, incident management (L1-L3), production support
- Programming & Scripting: SQL (advanced), Python (automation scripts, data validation, job support), Unix shell
- Version Control & DevOps: Git, GitHub/GitLab, branching & merge conflict resolution, CI/CD exposure
- Analytics & Reporting: Power BI, Alteryx
- Collaboration & Leadership: stakeholder communication, mentoring junior developers, process improvement initiatives

TECHNICAL TOOLKIT

- Data Engineering & ETL/ETL Tools: dbt, Snowflake, IBM DataStage, Control-M, Unix, Squirrel SQL Client, Python
- Data Analytics & Visualization: Alteryx, Power BI
- Programming Languages: SQL, Python, HTML5, JavaScript, TypeScript, C, CSS, Java, Visual Basic
- QA Automation Testing Frameworks & Tools: Cypress, Playwright, BrowserStack
- Version Control & CI/CD: GitHub, Git, GitLab, Unix
- Frontend Development Frameworks & Libraries: Vue.js, Bootstrap, Quasar
- Technical Documentation: Docusaurus.io
- Mobile Application Development: React Native, Expo Go
- UI/UX Design & Wireframing: Figma, Framer
- Multimedia & Video Editing: Canva, Filmora
- Integrated Development Environments (IDEs): Visual Studio Code, Code::Blocks
- Microsoft Office Suite: Word, Excel, Publisher, PowerPoint, Outlook, OneNote
- SEO & Web Optimization: WordPress, AISEO, H-tags, SEO Meta, Rich Results Test, XML Sitemap

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- dbt Fundamentals
- Snowflake for Developers
- Python for Data Science
- Data Science Foundations – Level 1
- Unix for Beginners
- Informatica Master Data Management (MDM) Concepts
- Career Boost with Power BI
- Agile Scrum Foundation
- Python Programming Training
- Data Science with Python
- Technical Vocational Online Training: Front-End Web Development

EDUCATION

ACADEMIC TRACK STRAND: STEM

Polytechnic University of the Philippines

- University Scholar
- Academic Excellence Award with Honors

BS IN COMPUTER SCIENCE

Technological University of the Philippines

- DOST-SEI JLSS Scholar
- President's Lister
